WORK EXPERIENCE

Open Source Contributor — AI & Cloud Infrastructure

Jan 2026 - Present

Kubernetes & vLLM

- **vLLM**: Co-authored cache-aware distributed LLM inference routing, utilizing **KV-cache** signals. [PR #49204]
- **vLLM**: Implemented `blocks_per_chunk` support for heterogeneous **KV-cache** groups, enabling **KV-cache** offloading. [PR #48878]
- **Kubernetes**: Merged fixes for Autoscaler and VPA, enhancing node-group sizing and **RBAC** correctness. [PR #9506] [PR #9515]
- **Falco**: Resolved system inspection issues, addressing integer overflow and file descriptor cleanup. [PR #2930] [PR #2926]

AI Systems Evaluation Intern

Aug 2026 - Sep 2026

AirDawg Labs (Caudal AI)

Mumbai, India (Remote)

- **Evaluated LLM and AI systems** through structured testing, **analytical review**, **prompt engineering**, and **software/system evaluation**.
- Contributed to **AI evaluation workflows** through testing, analysis, and model output validation.
- Assessed **AI system accuracy**, **reliability**, safety, and performance across assigned **evaluation projects**.

AWS Cloud Intern — AI Application Infrastructure

Jul 2025 - Dec 2025

TechEazy Consulting

Pune, India (Remote)

- Deployed and managed **AI applications on AWS** using Terraform across VPC, EC2, IAM, and S3.
- Automated **deployments, health checks, logging, and cloud cost optimization** for AI applications.

DevOps Intern — AI Application Infrastructure (Best Performer)

Apr 2025 - Jun 2025

Elevate Labs

Bengaluru, India (Remote)

- Orchestrated **CI/CD and GitOps workflows** for AI applications using Kubernetes, Docker, and GitHub Actions.
- Implemented **monitoring, observability, and recovery workflows** using Prometheus and Grafana.

FEATURED PROJECTS

Multimodal AI Agent | 📄 Github

- Built a **multimodal enterprise AI agent** with **FastAPI** and **LangGraph**, intelligently routing text, image, audio, video, and voice queries.
- Engineered **Hybrid RAG** using **dense search**, **BM25**, and **Cross-Encoder reranking** to deliver **grounded, confidence-scored answers**.
- Hardened AI tool execution using **read-only SQL validation** and an **AST-based calculator**, avoiding `eval()`/`exec()` risks.

RAG Evaluation Platform | 📄 Github

- Built **6-metric retrieval + LLM-judge hallucination eval suite** — replaces manual spot-checks with real benchmarks.
- Delivered **leaderboard** + auto-generated **JSON/CSV/Markdown reports** for cross-run comparison.
- **One-command Docker deploy** — the reproducible eval-pipeline setup teams need before shipping RAG changes to prod.

LLM Serving Platform | 📄 Github

- Developed production-style GPU LLM serving using **vLLM**, **Kubernetes**, and **Envoy**, incorporating full-stack observability.
- Benchmarked latency, throughput, and GPU utilization across serving configurations, including **AWQ quantization**.
- Modeled cost-per-token across configurations to evaluate tradeoffs based on GPU cost.

LLMOps Platform | 📄 Github

- Automated **zero-touch GitOps deploy** (Git → CI → Trivy → ECR → ArgoCD → EKS) — removes **manual kubectl apply risk**.
- **Auto-blocked builds** with critical CVEs using Trivy, enforcing security checks before **deployment**.
- Provisioned full **AWS infra as code** (VPC, EKS, ECR, IAM) — reproducible, **audit-friendly infra** vs manual console setup.

SKILLS

AI & LLM Applications :	Hybrid RAG, AI Agents, LangGraph, Embeddings, Reranking, QLoRA/PEFT Fine-Tuning
LLM Evaluation & Serving :	RAG Evaluation, LLM Evaluation, Benchmarking, Cost/Latency Analysis, Model Serving
LLM Inference & Optimization :	vLLM, LLM Optimization, KV-Cache Management, Distributed Inference, GPU Workloads
Programming, Databases & Data :	Python, SQL, Bash, HCL, Go, PostgreSQL, Qdrant, Vector Databases, SQLAlchemy, BM25
Cloud & AI Infrastructure :	AWS (EKS ECR IAM VPC), Kubernetes, Docker, Terraform, Helm, ArgoCD, GitOps, Prometheus

EDUCATION

Sambalpur University (SUIIT) | Odisha, India

Nov 2022 - Apr 2026

B.Tech Computer Science — Cyber Security
